EFFICIENCY ASSESSMENT OF PORTUGUESE MUNICIPALITIES USING A CONDITIONAL NONPARAMETRIC APPROACH

José Manuel Cordero

Universidade de Extremadura

18 novembro de 2015

17H30

Sala de Atos, Faculdade de Economia | Universidade do Algarve

José Manuel Cordero is an Associate Professor in the Department of Economics of the University of Extremadura, Spain. He holds a degree and Ph.D. in Economics from the same university. His scientific production has been focused in the following fields of research: efficiency measurement in the public sector, economics of education and fiscal federalism, including local and regional governments. His research experience in the aforementioned fields has been reflected in multiple scientific articles published in referred journals as well as in several books and book chapters. Among those contributions, the most relevant ones are related to operations research, with publications in Applied Economics, Journal of Operational Research Society or Computers and Operations Research. Likewise, he has also contributed to the literature of health economics with various publications in the European Journal of Operational Research, European Journal of Health Economics, and Journal of Medical Systems, and also to the literature on the efficiency of administrative services, having published in the International Review of Administrative Sciences.
