ENGINEERING

CinTurs' Master Seminars on Current Research Themes

Stanislav Ivanov

Professor at Varna University of Management, Bulgaria
Director of Zangador Research Institute

Is there a right way to use Artificial Intelligence in the academic scenario?

The webinar will discuss the potential areas of application of artificial intelligence in higher education institutions, its uses and abuses, and will outline the respective benefits and costs. It will cover various academic and research-related processes in higher education institutions. It will discuss the experiment of Varna University of Management with allowing the use of generative AI in student assignments and the lessons learned. The webinar will pay special attention to (research) ethics and the responsible use of AI.
